26.02.2012

Job Title   Developer (on-site)
Company   WidgiLabs Lda
Job Description   Thousands of businesses run WordPress. Many more would like to, and that's where you come in. You will be part of a small team building WordPress-based Web Apps & Business Solutions, always focusing on creating something simple, relevant and useful.

A superb candidate:
- You love putting together innovative technology solutions, with a special talent for making Web Apps that must scale.
- You not afraid of walking into a mega-huge code base, digging in and making yourself at home. And even helping tidy up a bit.
- You are self-motivated and a ferocious problem solver. You are not afraid saying "I don't know" and when you don't, you look for other options, make suggestions and decide with the team.
- You're dependable. If you say you're going to get something done by Tuesday, then it must be done by Tuesday.
- You're quick, but clean. This isn't your senior Computer Science class project where you get 9 weeks to make something cute. You need to be focused on getting results with speed. At the same time, you need to write clean, clear code that others can understand, that is scalable, object oriented, and commented.
- You're familiar with Agile software development practices (SCRUM) and test-driven development.
- You are eligible for an internship with IEFP (preferably).

An exceptional role:
- Using technologies such as Linux, Apache, MySQL, PHP and Javascript.
- Being comfortable in an environment that supports short iteration cycles with frequent releases (that is, deadlines).
- Teaming with WidgiLabs team members making the effort to move our projects forward the more efficient and quickly possible.
- Working independently, prioritizing and accomplishing the tasks needed to achieve all goals.

The ideal opportunity to get technical:

A job at WidgiLabs is a chance to develop your knowledge and experience. To contribute meaningfully to people's lives and more important to people's businesses.

To belong to a worldwide community, learn, share and grow with it.
